Summary

SAP ABAP Developer skilled in ABAP Objects, OData services, CDS views, Fiori integrations, BAPI integration, and debugging, with hands-on experience in proactive system monitoring. SAP Certified Associate Back-End Developer – ABAP Cloud and agile-focused, committed to delivering maintainable solutions that enhance system reliability and developer productivity.

Skills

Technical Skills: SAP ABAP Objects, Fiori, Smart Forms, ALV, OData, CDS Views, HTML, CSS, JavaScript.
Technologies & Tools: SAP GUI, Eclipse ADT, BAS, Postman, ServiceNow.

Experience

IBM, Bengaluru — Feb 2024 - Present

Application Developer | *SAP ABAP*

- Developed a custom ABAP report to configure multi-sheet Excel data into SAP tables, reducing manual setup and improving data consistency.
- Built an OData service for user access management by identifying lock and password-related issues through tables such as USR02 and resolving them using standard SAP.
- Developed an OData service to retrieve transport request insights, consolidating tasks, object names, and descriptions to provide a unified and developer-friendly view.
- Performed proactive SAP system monitoring and issue resolution and corrected process chain failures to ensure high system availability.
- Built a proof-of-concept RAP-based service and CDS view prototypes to expose Fiori-ready OData services, practicing behavior definitions, associations, and end-to-end service provisioning**.**
- Utilized ABAP Objects, including ALV, to design and implement custom solutions that enhance business processes.

Education

Visvesvaraya Technological University — Karnataka, India

Bachelor of Engineering in Computer Science and Engineering — CGPA of 7.86
